One of your projects this Term is to create a digital book for the Lower School to read.

The digital book is to be a minimum of 10 pages long, not including the front and back cover.

Preferably, it is to be created in mixbook.com, but if the issues with that website aren’t resolved, then it is to be created in http://bookbuilder.cast.org

The topic of your digital book, is your choice. You can do one like the sample based on a school activity, or you could do one based on a sport you love, explaining the details of the game, your hobby, something you are interested in. You must remember it is to be appropriate for the Lower School

If you select a school activity, then you can access school photos.

If you select another topic, you will have to take your own photos or get images that totally reflect your story.

The Rubric, clearly shows what you need to do to obtain an A standard.

Due date is Thursday 16th August, week 6. We are in week 2. You will receive some class time to complete this task, but some will have to be completed in your own time.

You do have to submit your plan on the story board template by Friday 27th July. This can be printed or on your USB.
