

Beechmont State School P&C Outside School Hours Care PHILOSOPHY

At Beechmont State School P&C Outside School Hours Care we believe children learn through exploring their environment. We provide active learning environments where educators assist children to engage, gain confidence and build lifelong skills.

Our educators build trusting, nurturing relationships with every child and their families. Through these relationships children learn acceptance, decision making and connect to the world in which they live.

We implement a blended approach to children's learning, including scaffolding intentional teaching practices with child initiated experiences.

Every child is valued and their individuality and family background taken into consideration to ensure they can fully participate in our Outside School Hours Care environment.

At Beechmont State School P&C Outside School Hours Care all children are provided with opportunities to make choices, decisions and be fully involved in matters that concern them.

We have created a natural home like environment and model respect by supporting sustainable practices with our everyday activities.

We strive to educate both children and families about the world's sacred natural resources.

We value the importance of keeping Australia's history alive and strive to embed Aboriginal and Torres Strait Islander perspectives throughout our environment and community.

We foster open and honest communication with families and develop individual profiles and programming for each child. Documentation of children's learning occurs from the planned and spontaneous experiences that foster each child's learning and development.
